

Which car seat is right for you?

Each car seat is tailored to fit your child's current needs, offering the highest level of comfort, safety and convenience. Your child's safety is Maxi-Cosi's top priority, so you can enjoy all those precious moments whilst travelling with your child.

What is the best car seat for my child?

The best car seat is the one that suits your child's current height and weight, fits your car(s), is easy to install while offering the highest level of safety possible. Here are some useful tips and recommendations to help you decide which car seat is best for your child.

Choosing your first car seat

Car seat options for your newborn include baby car seats (also called infant carriers) which are compatible with Maxi-Cosi and Quinny pushchairs and can be installed with the car seat belt or a base. You can also choose a combination car seat suitable from birth to 4 years, making it a long lasting travel solution. Don't forget to look at bases too. Once they are installed in the car securely, you're guaranteed peace of mind that your little one is safe, and the seat simply clicks in and out with ease, perfect for busy parents.

For toddlers only

In the car, your baby is safest when travelling in a rearward facing seat until 13kg (approx. 15 months). It is recommended to keep your baby in a rearward facing seat as long as possible but it's time to move up to a toddler seat when the top of your baby's ears reach the top of the back of the baby seat.

As your child grows

It may seem a long way off, but time does fly! Between your child's 3rd and 4th birthday, it's recommended that you upgrade them to the next stage car seat to ensure your child is well protected on trips to school, playdates and many more! These car seats are built with your child's comfort in mind and include an adjustable backrest, which allows you to change the height and sometimes width to suit your growing child!
